Email Alerts and RSS Feeds – SAGE Journals

Database alerting services allow you to select information of interest and then be notified regularly, via email or RSS feeds, of new information available. The tables of contents of specific journals, magazines, and newspapers, the output of search queries, and specific article citations can all be pushed to your email inbox or to an RSS reader. These services make it easier to stay on top of developments in your field of interest.

SAGE Journals offer two types of alerts to Seneca College students, faculty, and staff:
  • Journal Alerts
  • Search Alerts

Users must register with SAGE to take advantage of these alerting services:
1. Sign in to SAGE.

2. Click the “Browse” link in the menu along the top:

3. Locate the desired publication by searching for the title alphabetically or by discipline:
4. Click on the name of the publication to go to its details screen:

![Accounting History Journal Details]

6. Scroll down the page until you see, on the right-hand side, the “Connect with us” section:

![Connect with us Section]

---

*Last Updated: 26 January 2017*
From here, click either “Sign Up” to set up e-mail alerts for this journal, or click the orange-and-white RSS icon to set up an RSS feed to notices about new content from it.

a) If you click the “Sign Up” e-mail alert option, you will see this...

Select whether you want e-mail alerts about New Content or just Announcements from this journal, or both, and then click “Add Alerts”.

b) If you click the orange-and-white RSS feed option, you will see this...
Read the instructions on how to set up this RSS feed using an external RSS reader.
1. Sign in to SAGE.

2. Click “Advanced Search” and conduct a search. Note we do not have access to all SAGE content, so it is recommended that you limit your search to what we do have by selecting “Only content I have full access to”:

3. When the results appear, click “Save Search”: 
Enter a name for the search and select how frequently you would like to be emailed about new SAGE content that fits your search criteria. You would select “Never” if you don’t want email alerts about new content, but rather only want to save the search so that you can obtain new results yourself the next time you sign into the SAGE database.

Note that it is not possible to create RSS feeds to searches the same way you created them for journals in the previous section.
