

## OBTAINING PERSISTENT LINKS TO SAFETYHUB VIDEOS

The information you need to create a persistent link for a video is within the results lists, not within the video itself.

1. Start by retrieving the video either by using the search box or navigating through the Video Categories on the database's homepage:

The screenshot shows the homepage of the SafetyHub database. At the top left is the Seneca College logo. A search box with a magnifying glass icon is circled in black. Below the search box is a yellow navigation bar with a home icon, a dropdown menu set to 'North America', and the 'safetyhub' logo. The main content area is titled 'Select a Video Category' and features a grid of 16 video category thumbnails. The 'fire awareness' thumbnail, which shows a fire, is circled in black. A black arrow points from this thumbnail down towards the bottom of the page. At the bottom left is the SAFETYCARE logo and a tagline: 'For over 25 years Safetycare has been helping organizations protect their most valuable asset; its people.' At the bottom right is a 'Get In Touch' section with a 'Send us an email' button.

**Building and Office Evacuation**

There are many reasons why a building, or a group of buildings may need to be evacuated including:

- Fires
- Chemical Spills
- Toxic or Explosive Gas Releases,
- Explosions
- Violent Behavior, and
- Bomb Threats.

The larger the building, the more organization is required to ensure everyone is evacuated effectively and as safely as possible. But regardless of the size or type of building or buildings, or number of employees, every organization should have a tried and tested evacuation plan.

**This program covers:**

- The Evacuation Plan
- The Evacuation Team
- The Chief Warden
- Your Responsibility
- Training and Practice

Every Building must have a tried and tested evacuation plan, and everyone must be familiar with it, and know their role.

3. Click the little “EMBED” button in the pop-up...

The screenshot shows the Seneca College SafetyHub interface. At the top, there is a search bar and a navigation menu with 'North America' selected. Below this, a 'Select a Video' section displays a grid of eight video thumbnails. The 'Building and Office Evacuation' video is highlighted, and its 'MORE INFO' button is circled. A pop-up window shows the embed code for this video, with the URL `https://seneca-safetyhub-com.libaccess.senecacollege.ca/embeddirect/X9G8D0RK/1033584` circled. Other video titles visible include 'Bomb Threats', 'Burns', 'Fire Extinguishers', 'Fire Safety Awareness', 'Office Fire Management', 'Static Electricity', and 'Workplace Housekeeping'.

... and copy into a text editor the URL that is then displayed.

4. Replace everything in the URL before `/embeddirect` with:

`"https://libaccess.senecacollege.ca/login?url=http://seneca.safetyhub.com"`

So in the above example, the complete persistent link to this video titled *"Building and Office Evacuation"* would be:

`https://libaccess.senecacollege.ca/login?url=http://seneca.safetyhub.com/embeddirect/X9G8D0RK/1033584`

5. Test links before posting via email, to course webpages, etc.
