

OBTAINING PERSISTENT LINKS USING THE SEARCH BOX ON THE SENECA LIBRARIES HOMEPAGE

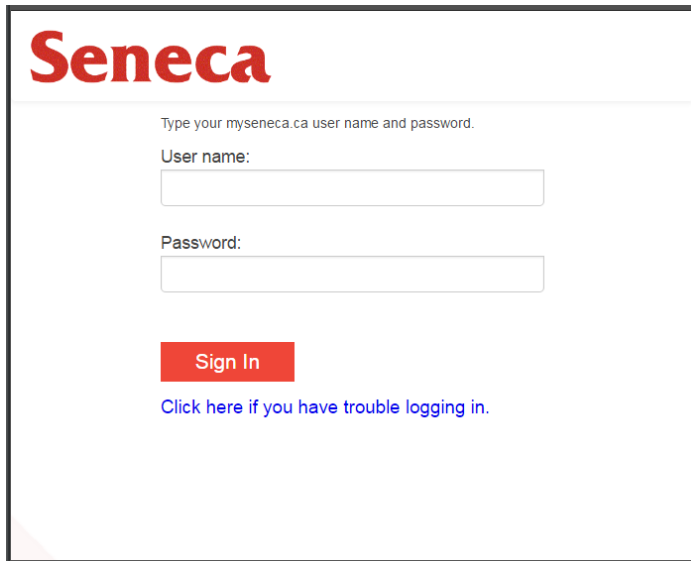

Creating links to searches requires that you sign in. While signing in is not required to create links to individual title records, it is still recommended as it will allow you to see fuller results, and also allow you to save titles and searches you regularly run that you may want to refer to at a later date.

A. Creating links to searches:

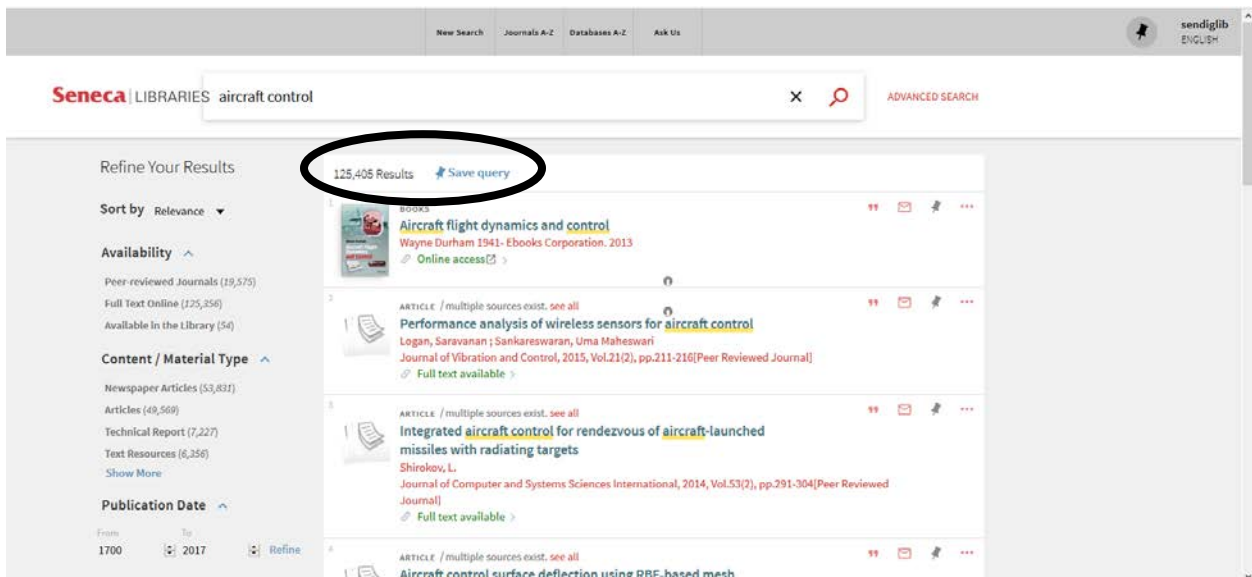

1. Go to <http://library.senecacollege.ca> and perform a search for a title or titles. Click “Sign In”:

The screenshot shows the Seneca Libraries homepage search results page. The search box contains the text "aircraft control" with a black arrow pointing to it. Below the search box is a yellow banner with the text "Sign in to get complete results, save items and searches, and request items." and a "Sign in" button with a black arrow pointing to it. The search results show 119,119 results. The first result is a book titled "Aircraft flight dynamics and control" by Wayne Durham 1941- Ebooks Corporation. 2013. The second result is an article titled "Performance analysis of wireless sensors for aircraft control" by Logan, Saravanan ; Sankareswaran, Uma Maheswari. The third result is an article titled "Aircraft control surface deflection using RBF-based mesh deformation" by Michler, Andreas K. The left sidebar shows "Refine Your Results" with options for "Sort by Relevance", "Availability", "Content / Material Type", and "Publication Date".

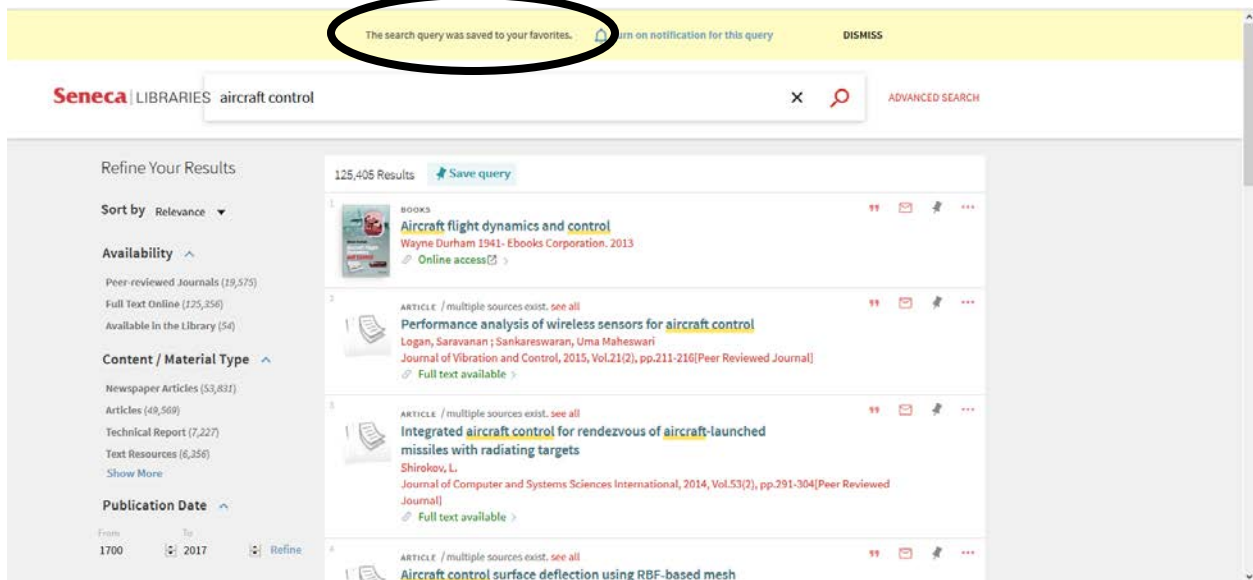

2. When prompted, enter your Seneca username and password:

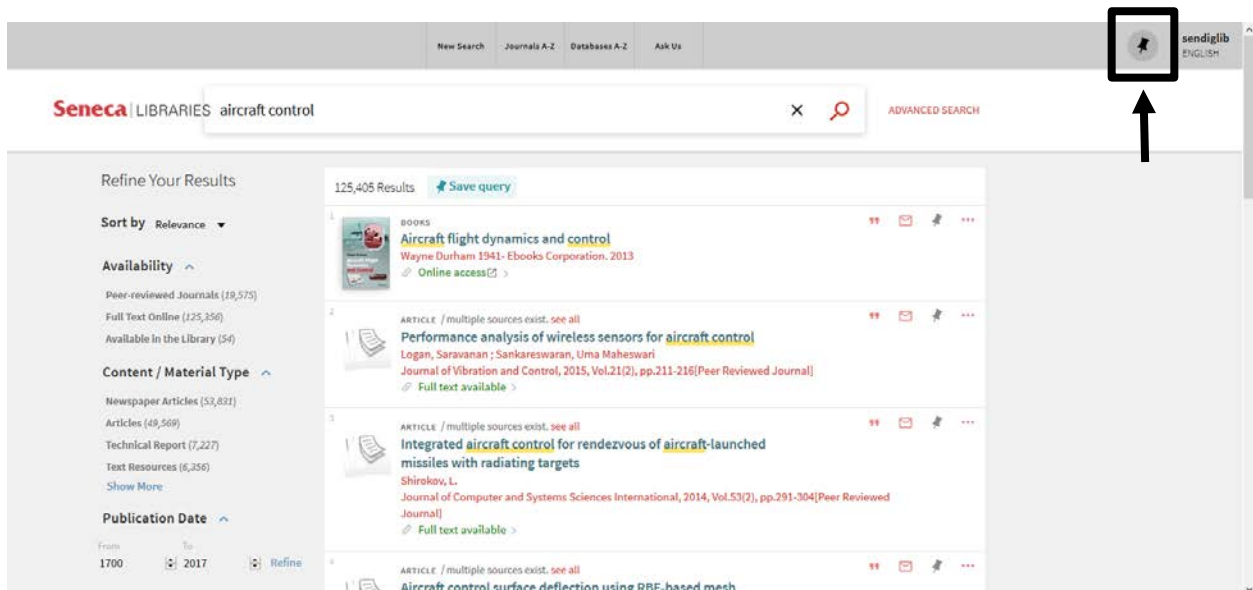

3. Once you successfully login, additional results may appear and next to the result total you will see "Save query":

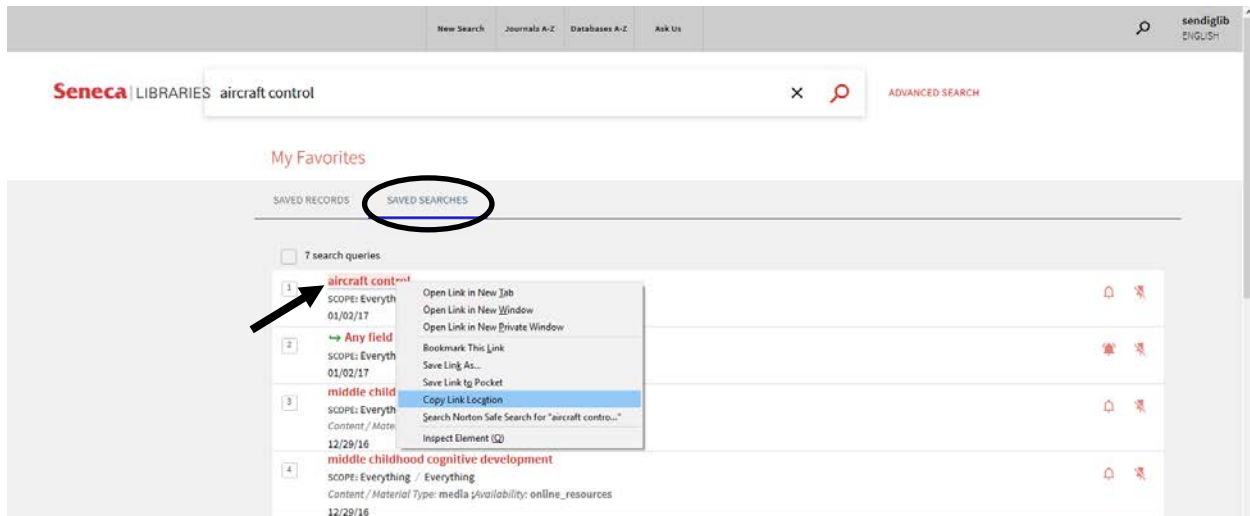

When you click "Save query" you will get a message that says that the query has been saved to your "Favorites":

The message will disappear after a moment to reveal the main menu bar again. Click the pushpin icon in the upper-right corner:

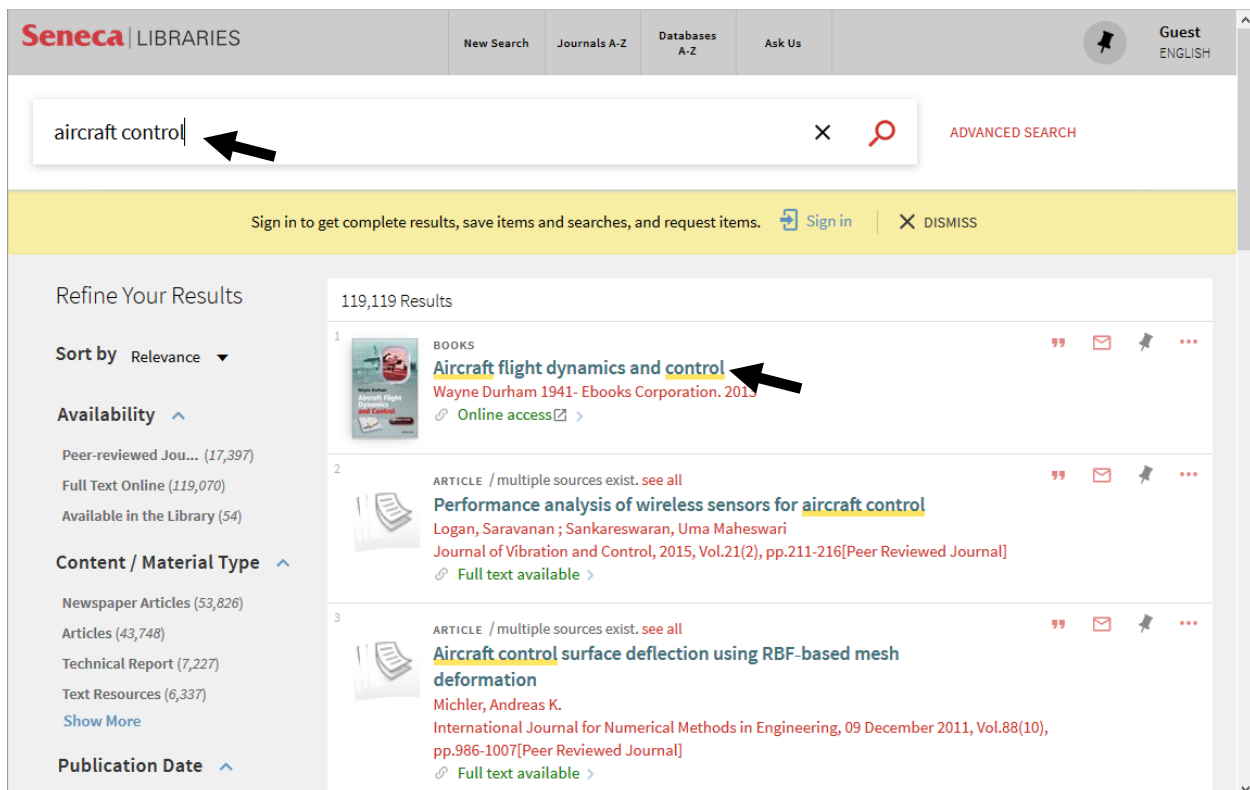

4. Click “SAVED SEARCHES” and right-click on the search you want to obtain a link for. Depending on your browser, you then select “Copy link location” or “Copy link address” or “Copy shortcut” to obtain the link:

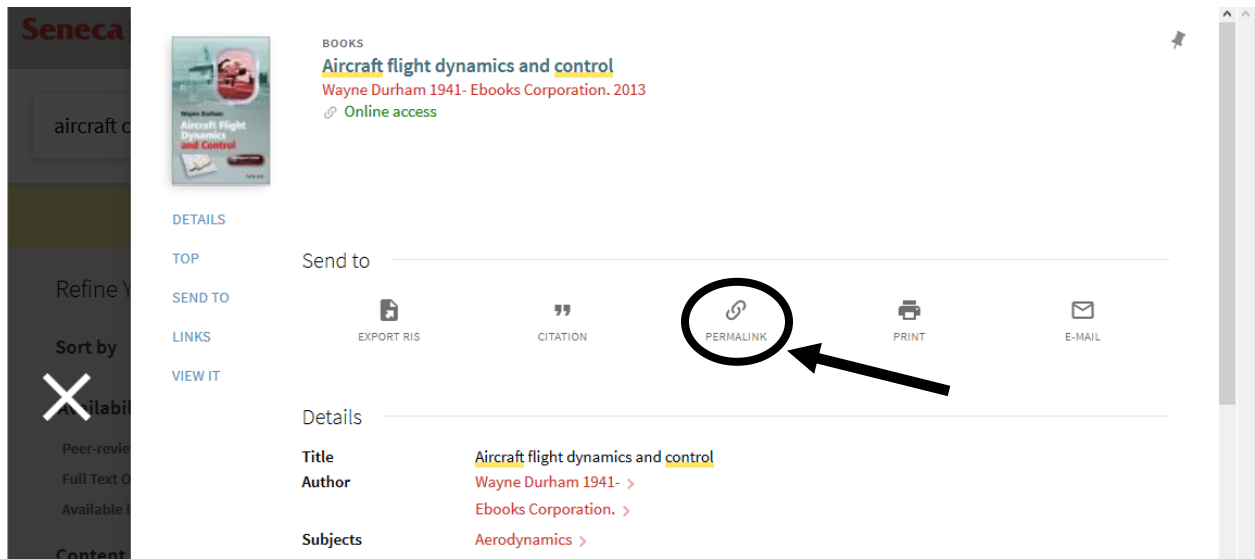

5. Test all links prior to posting via email, on course webpages, etc.

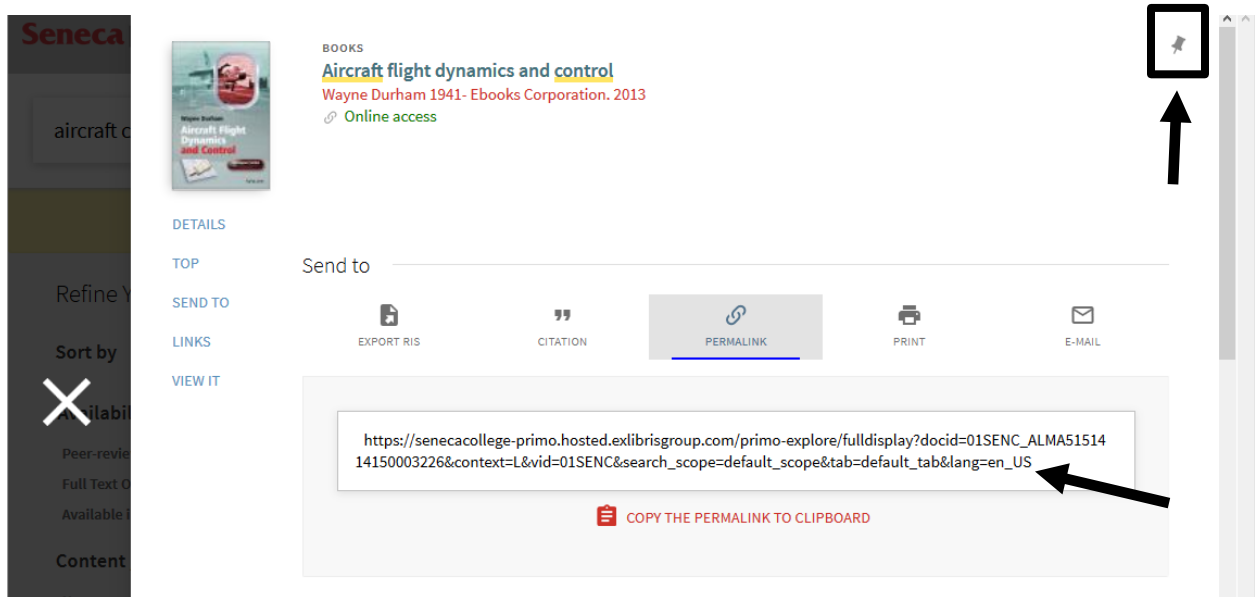

B. Creating links to individual titles (a single book, video, article, etc.):

1. Go to <http://library.senecacollege.ca> and perform a search for a title or titles. Click into a title in your results list. Let's take the book *Aircraft Flight Dynamics and Control*:

3. Click "PERMALINK" and copy the URL you are given:

4. Alternatively, you may save the title to your Favorites as you did with the Search example above by clicking the pushpin icon in the upper-right corner. Doing so will result in being prompted to "Sign In" if you are not already signed in. You would then click "SAVED RECORDS", and then click into the record you want, followed by "PERMALINK" in the same way as above:
